Software Testing

Software Testing is specially developed to serve as a text book for the undergraduate and postgraduate students of Computer Science Engineering and Information Technology. The book focusses on software testing as not just being the phase of software development life cycle but a complete process to fulfill the demand of quality software. Written in a very lucid style with crisp and to-the-point descriptions, the book covers chapters on the various software testing methodologies, test management, software metrics, software quality assurance, test automation, object-oriented testing and debugging. It also describes all the methods for test case design which is the prime issue for software testing. The book is interactive and includes a large number of test cases, examples, MCQs and unsolved problems for practice.

A boy who can recall his past life. A hint of hidden treasure. An adventure in the desert of Rajasthan . . . In one of their most hair-raising escapades ever, Feluda and Topshe set out for Rajasthan on the trail of the parapsychologist Dr Hajra and Mukul, a boy who claims he remembers his previous life. On the way they meet Jatayu, an author of popular crime thrillers, who decides to accompany them. After numerous adventures, including an impromptu camel ride across the desert, they reach Mukul's Golden Fortress, where Feluda unravels the many strands of a complex case.

Crucible of Conflict

Anthropology has long shied away from examining how human beings may lead happy and fulfilling lives. This book, however, shows that the ethnographic examination of well-being--defined as \"the optimal state for an individual, a community, and a society\"--and the comparison of well-being within and across societies is a new and important area for anthropological inquiry. Distinctly different in different places, but also reflecting our common humanity, well-being is intimately linked to the idea of happiness and its pursuits. Noted anthropological researchers have come together in this volume to examine well-being in a range of diverse ways and to investigate it in a range of settings: from the Peruvian Amazon, the Australian outback, and the Canadian north, to India, China, Indonesia, Japan, and the United States. Gordon Mathews is a Professor in the Department of Anthropology at the Chinese University of Hong Kong. He has written *What Makes Life Worth Living? How Japanese and Americans Make Sense of Their Worlds* (1996) and *Global Culture /Individual Identity: Searching for Home in the Cultural Supermarket* (2000), and co-written *Hong Kong, China: Learning to Belong to a Nation* (2007); he has co-edited *Consuming Hong Kong* (2001) and

Japan's Changing Generations (2004). Carolina Izquierdo is currently a postdoctoral researcher at the Center for the Everyday Lives of Families (CELF) at the University of California, Los Angeles. Her research has centered on health and well-being among the Matsigenka in the Peruvian Amazon, the Mapuche in Chile, and middle-class families in the United States.

The Golden Fortress

The Book covers the history of the military in the Indian subcontinent before the precolonial era. The text introduces the geographical aspects in setting up the militaristic approaches for campaigns in various battles and conquest of territories. The main part of this book deals with the history of foreign invasions in India. The author begins with the history of Greek invasions in ancient India, which is the classical military conflict between Alexander and Porus. It also covers the strategical tactics adopted. However, the greater part of this book deals with the Islamic invasions in India beginning with Muhammad Ghori's campaign and the military stratagems adopted by the Sultans of Delhi. It covers the Mughal invasion with the first battle of Panipat in 1526 against Ibrahim Lodi and the successive battles by the Mughal successors. The final part deals with the war of succession by Shah Jahan's sons, warfare under the Nizams of Hyderabad, and the military account under the Maratha rule.

Caste Conflict and Elite Formation is a study in the social history of Sri Lanka. However, it does not merely document the remarkable successes in business enterprise and in the acquisition of Western-educated professional skills which were achieved by families from the Karava caste during the last two centuries; their advances, and the social and political struggles which accompanied this process, are employed as a window through which a survey of social change in Sri Lanka during the last four hundred years is conducted. The interest of the book extends beyond the many fascinating social incidents, historical trends and channels of elite formation that are described within its pages to a series of controlled comparisons which reveal the factors responsible for the formation of the Karava elite. Thus the book extends the methodological frontiers of the social history of the region. It emphasizes the significance of the patterns of caste discrimination and caste interaction in Sri Lankan politics, and reveals how these patterns were central to the incentives and opportunities which powered the advances of the Karava families.

Pursuits of Happiness

Highlights of the book: Discussion about all the fields of Computer Aided Engineering, Finite Element Analysis Sharing of worldwide experience by more than 10 working professionals Emphasis on Practical usage and minimum mathematics Simple language, more than 1000 colour images International quality printing on specially imported paper Why this book has been written ... FEA is gaining popularity day by day & is a sought after dream career for mechanical engineers. Enthusiastic engineers and managers who want to refresh or update the knowledge on FEA are encountered with volume of published books. Often professionals realize that they are not in touch with theoretical concepts as being pre-requisite and find it too mathematical and Hi-Fi. Many a times these books just end up being decoration in their book shelves ... All the authors of this book are from IITs & IISc and after joining the industry realized gap between university education and the practical FEA. Over the years they learned it via interaction with experts from international community, sharing experience with each other and hard route of trial & error method. The basic aim of this book is to share the knowledge & practices used in the industry with experienced and in particular beginners so as to reduce the learning curve & avoid reinvention of the cycle. Emphasis is on simple language, practical usage, minimum mathematics & no pre-requisites. All basic concepts of engineering are included as & where it is required. It is hoped that this book would be helpful to beginners, experienced users, managers, group leaders and as additional reading material for university courses.

The concept of well-being has emerged as a key category of social and political thought, especially in the fields of moral and political philosophy, development studies and economics. This book takes a critical look at the notion of well-being by examining what well-being means, or could mean, to people living in a number of different regions including Sudan, Nepal, Papua New Guinea, India, Sierra Leone and the UK. The contributors take issue with some of the assumptions behind Western concepts of well-being. They explore what characterises a 'good life' and how this idea has been affected by globalisation and neoliberalism. The book makes a major contribution to social theory by presenting new analytical models that make sense of the changing shapes of people's life and ethical values.

Changing the Indian Economy: Renewal, Reform and Revival explores the fact that post-Modi India is witnessing unprecedented socioeconomic change, truly labeled as Modi's Mantra and his attempts to morph the Indian economic landscape. India is using an intelligent economic process for its renewal and growth, however, in a recent study by Nomura, 2016, The Japanese Financial Services firm, it is reported that there is downside risk to India's baseline forecast of 7.8 per cent GDP growth in 2016. Although the report suggests that there was a mid-cycle consolidation in mid-2014, the recovery seems to be losing momentum. This book offers a novel, but inclusive outlook to the entire post-Modi economic overhaul. Offers a comprehensive narrative of the current economic scene in India Explores how the measures for reform are intelligent, while also considering their weaknesses Shows how India has a strong potential to grow amidst diversity of economic reforms and changing governance Includes a compilation of insightful articles on Indian economic reform and future prospects

Practical Finite Element Analysis

This work covers computers and the principles in designing digital controllers. Details on computer networking, topology, communication protocol, and a brief description of DCS are provided. New topics, such as programmable logic control (PLCs), smart sensors and fieldbus, identification and design of nonlinear controllers are also covered. The text also presents fundamentals of fuzzy logic control, design of such controllers, and use of fuzzy logic in improving the performance of conventional PID controllers.

Georgian literary sources for Late Antiquity are commonly held to be later productions devoid of historical value. As a result, scholarship outside the Republic of Georgia has privileged Graeco-Roman and even Armenian narratives. However, when investigated within the dual contexts of a regional literary canon and the active participation of Caucasia's diverse peoples in the Iranian Commonwealth, early Georgian texts emerge as rich repositories of late antique attitudes and outlooks.

This book provides a general introduction to the history of Jewish life in 14th century Asia at the time of the conqueror Tamerlane (Timur). The author defines who are the Central Asian Jews, and describes the attitudes towards the Jews, and the historical consequences of this relationship with Tamerlane. Left alone to live within a stable empire, the Jews prospered under Tamerlane. In founding an empire, Tamerlane had delivered Central Asia from the last Mongols, and brought the nations of Transoxonia within the orbit of Persian civilisation. The Central Asian Jews accepted this spirit and preserved it until modern times in their language and culture.

Dark Horse

The Indian Uprising of 1857 had a profound impact on the colonial psyche, and its spectre haunted the British until the very last days of the Raj. For the past 150 years most aspects of the Uprising have been subjected to intense scrutiny by historians, yet the nature of the outbreak itself remains obscure. What was the extent of the conspiracies and plotting? How could rumours of contaminated ammunition spark a mutiny when not a single greased cartridge was ever distributed to the sepoys? Based on a careful, even-handed reassessment of the primary sources, *The Great Fear of 1857* explores the existence of conspiracies during the early months of that year and presents a compelling and detailed narrative of the panics and rumours which moved Indians to take up arms. With its fresh and unsentimental approach, this book offers a radically new interpretation of one of the most controversial events in the history of British India.

Ancient Mesopotamia

Berossus and Genesis, Manetho and Exodus proposes a provocative new theory regarding the date and circumstances of the composition of the Pentateuch. Gmirkin argues that the Hebrew Pentateuch was composed in its entirety about 273-272 BCE by Jewish scholars at Alexandria that later traditions credited with the Septuagint translation of the Pentateuch into Greek. The primary evidence is literary dependence of Gen. 1-11 on Berossus' Babyloniaca (278 BCE) and of the Exodus story on Manetho's Aegyptiaca (c. 285-280 BCE), and the geo-political data contained in the Table of Nations. A number of indications point to a provenance of Alexandria, Egypt for at least some portions of the Pentateuch. That the Pentateuch, drawing on literary sources found at the Great Library of Alexandria, was composed at almost the same date as the Septuagint translation, provides compelling evidence for some level of communication and collaboration between the authors of the Pentateuch and the Septuagint scholars at Alexandria's Museum. The late date of the Pentateuch, as demonstrated by literary dependence on Berossus and Manetho, has two important consequences: the definitive overthrow of the chronological framework of the Documentary Hypothesis, and a late, 3rd century BCE date for major portions of the Hebrew Bible which show literary dependence on the Pentateuch.

This book is the first to present current scholarship on gender and in regional and sectarian versions of the

R?m?ya?a. Contributors explore in what ways the versions relate to other R?m?ya?a texts as they deal with the female persona and the cultural values implicit in them. Using a wide variety of approaches, both analytical and descriptive, the authors discover common ground between narrative variants even as their diversity is recognized. It offers an analysis in the shaping of the heterogeneous R?ma tradition through time as it can be viewed from the perspective of narrating women's lives. Through the analysis of the representation and treatment of female characters, narrative inventions, structural design, textual variants, and the idiom of composition and technique in art and sculpture are revealed and it is shown what and in which way these alternative versions are unique. A sophisticated exploration of the R?m?ya?a, this book is of great interest to academics in the fields of South Asian Studies, Asian Religion, Asian Gender and Cultural Studies.

The Great Fear of 1857

This book is the first major exploration of Indian political economy using a constructivist approach. Arguing that India's open-economy policy was made, justified, and continued on the basis of the idea of openness more than its tangible effect, the book explains what sustained the idea of openness, what philosophy, interpretations of history, and international context gave it support, justification, and persuasive force. Drawing on a wide range of contemporary and historical sources, and going as far back as the 19th century, the author reconstructs how Indian policymakers have interpreted economic priorities, perceived success and failure, and evaluated the destiny of their nation. By the 1990s, their imperatives increasingly highlighted a sense of rivalry, especially with China, and globalism, a desire to play a strong role in world affairs. The book shows how a sense of nationalist urgency was created through globalism and rivalry, allowing policymakers to privilege international needs over domestic political demands, replace economic independence with interdependence as a priority, and ensure that the broad basis of India's openness could not be challenged effectively even though certain policies faced severe opposition. This book will be of interest to those working on International Political Economy, Globalization, Economic History, Public Policy, and South Asian politics.

Falling for Hamlet

Global growth for 2018–19 is projected to remain steady at its 2017 level, but its pace is less vigorous than projected in April and it has become less balanced. Downside risks to global growth have risen in the past six months and the potential for upside surprises has receded. Global growth is projected at 3.7 percent for 2018–19—0.2 percentage point lower for both years than forecast in April. The downward revision reflects surprises that suppressed activity in early 2018 in some major advanced economies, the negative effects of the trade measures implemented or approved between April and mid-September, as well as a weaker outlook for some key emerging market and developing economies arising from country-specific factors, tighter financial conditions, geopolitical tensions, and higher oil import bills. The balance of risks to the global growth forecast has shifted to the downside in a context of elevated policy uncertainty. Several of the downside risks highlighted in the April 2018 World Economic Outlook (WEO)—such as rising trade barriers and a reversal of capital flows to emerging market economies with weaker fundamentals and higher political risk—have become more pronounced or have partially materialized. Meanwhile, the potential for upside surprises has receded, given the tightening of financial conditions in some parts of the world, higher trade costs, slow implementation of reforms recommended in the past, and waning growth momentum.

Racial and Ethnic Groups

In recent years, ethnographic fieldwork has been subjected to analytical scrutiny in anthropology. Ethnography remains anchored in tropes of spatiality with the association between field and fieldworker characterized by distances in space. With updates on the discussion of contemporary requirements to ethnographic research practice, *Time and the Field* rethinks the notion of the field in terms of time rather than space. Such an approach not only implies a particular attention to the methodology of studying local (social

and ontological) imaginaries of time, but furthermore destabilizes the relationship between fieldworker and fieldsite, allowing it to emerge as a dynamic and ever-shifting constellation.

The Other Ramayana Women

Interdisciplinary in its approach, this book explores the dilemmas that Buddhism faces in relation to the continuing ethnic conflict and violence in modern Sri Lanka. Prominent scholars in the fields of anthropology, history, Buddhist studies and Pali examine multiple dimensions of the problem. Buddhist responses to the crisis are discussed in detail, along with how Buddhism can help to create peace in Sri Lanka. Evaluating the role of Buddhists and their institutions in bringing about an end to war and violence as well as possibly heightening the problem, this collection puts forward a critical analysis of the religious conditions contributing to continuing hostilities.

India's Open-Economy Policy

Understanding consciousness by taking the stream of consciousness seriously; a general characterization of experience and a detailed description of experience from within, drawing on theories of William James, Alfred North Whitehead, John Searle, and Gerald Edelman. In *Onflow*, Ralph Pred supplies an account of the nature of consciousness that grapples with "the raw un verbalized stream of experience." Unlike other recent philosophical accounts of consciousness, Pred's analysis deals with the elusive and commonly neglected continuities in the stream of consciousness. Pred offers a general characterization and analysis of experience as well as a highly detailed interpretation of experience from within. Determined to make "conceptual contact" with the immediacy of actual experience, Pred carries forward the radical empiricism pioneered by William James (who coined the term "stream of consciousness") and draws on the process philosophy of Alfred North Whitehead. To help readers apprehend the formation of conscious thoughts, the intertwining of perception and action, and the working of consciousness in onflowing experience, Pred applies methods of analysis developed in John Searle's theory of intentionality to James's views, thereby showing how intentional states are embedded in the stream of consciousness. Then, calling on Whitehead's treatment of lived moments as acts of experience, Pred provides an account of consciousness that at once deals with conscious thoughts as they emerge from and function in embodied, socialized experience and illustrates how language distorts our understanding of experience and subjectivity. Finally, he details striking parallels between this account and Gerald Edelman's biological theory of consciousness, and, in contrasting the two, argues for a revitalized version of the experiential monism originally formulated by James.

Time and the Field

From #1 New York Times bestselling author Lauren Blakely comes the final book in the sexy, emotional and deliciously addictive No Regrets trilogy. It started as one night. It turned into a friendship. Then Harley became my everything. She owns me, heart, mind and body. And for a few brief days, our future seems bright and certain. Until, the past wraps its arms around us in so many terrible ways. Someone I never expected to see again reappears in my life. Trying to keep us apart. I'll do anything for her, but the question is - will anything even be enough? Every Second With You is the final novel in the No Regrets and should be enjoyed following The Thrill of It.

The Rani of Jhansi

An outline of the plan of redemption. This book answers more vital questions about Christianity than any other book.

A Series of Plays

Paul Bairoch deflates twenty commonly held myths about economic history. Among these myths are that free trade and population growth have historically led to periods of economic growth, and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World. Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States, Europe, and the Third World, and he re-examines the facts to set the record straight. Bairoch argues that until the early 1960s, the history of international trade of the developed countries was almost entirely one of protectionism rather than a \"Golden Era\" of free trade, and he reveals that, in fact, past periods of economic growth in the Western World correlated strongly with protectionist policy. He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries, as some economists and many politicians have held. Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution, the effects of the economic development of the West on the Third World, and beliefs about the 1929 crash and the Great Depression. Bairoch's lucid prose makes the book equally accessible to economists of every stripe, as well as to historians, political scientists, and other social scientists.
