How to: Disconnect exhaust hangers with pliers \u0026 lower exhaust - How to: Disconnect exhaust hangers with pliers \u0026 lower exhaust by Craig's DIY Car 95,259 views 6 years ago 5 minutes, 48 seconds - Disconnecting rubber **exhaust hangers**, can be a real bear but it's possible with needle nose pliers, some silicone grease, and the ...

Now You Could Also Use a Ptfе or Teflon Type but You Should Avoid Petroleum Products because of the Potential Damage to the Rubber and You'll Want some Pliers so Yeh so You Need To Take each Hanger and Coat the Rod End with Grease and I Try To Push some of the Grease into the Hole in the Rubber As Much as You Can and Then Get Your Pliers and Here's Where the Needle Noses Are Useful because You Can Just Jam Them into the Rubber Hole so as To Get a Grip on the Rubber from the Bottom as Shown Maybe Lift the Exhaust a Little if It Helps To Take some Weight off It

And Here's Where the Needle Noses Are Useful because You Can Just Jam Them into the Rubber Hole so as To Get a Grip on the Rubber from the Bottom as Shown Maybe Lift the Exhaust a Little if It Helps To Take some Weight off It and Then You Just Grip As Hard as You Can and Try To Pull It

So as To Get a Grip on the Rubber from the Bottom as Shown Maybe Lift the Exhaust a Little if It Helps To Take some Weight off It and Then You Just Grip As Hard as You Can and Try To Pull It Off Now You Need To Work the Rim of the Hole in the Rubber around the Stop on the Rod So once It's over the Rim It'll Become Much Easier and Then Finally It'll Pop Off without Much Resistance and Then after that You Just Need To Repeat that Repeat that Process with All the Hangers Make Sure You Don't Miss any as Sometimes They're a Little Hidden

So once It's over the Rim It'll Become Much Easier and Then Finally It'll Pop Off without Much Resistance and Then after that You Just Need To Repeat that Repeat that Process with All the Hangers Make Sure You Don't Miss any as Sometimes They're a Little Hidden if You're Looking under a Car Especially that's Just Up on Jack Stands It Can Be Easier To Miss One and by the Way What I'm Doing Here Is Disconnecting All the Hangers except the Rear Most One at the Muffler

You Will Need Enough Slack in Them To Allow the Exhaust To Drop Away Otherwise Your Damages Sensor or a Cable So in My Case Is Enough Here To Just Unhook the Cable from with Its Little Sort of Bracket Little Grommets on the Heat Shield and this Showing Here Is a Fairly Central Hanger on My System and I Had the Idea To Add some Support to the Middle of the Exhaust as I Lowered It so that It Wasn't Wanting To Bend under Its Own Weight So I Hooked Up this Elastic To Do that although in Retrospect So It Will Be a Little Bit More Difficult and You May Need To Lift the Exhaust To Take the Force off of the Hanger and Then once It's Free You Can Carefully Lower It down the Flex Pipe at the Front below the Header Will Allow the Whole Thing To Articulate Down Just Keep an Eye on the O2 Sensor Cable or Cables as I Mentioned and Also You Can See Here that the Elastic Taking Up Is Taking Up a Little Bit and Providing some You Know Midsection Support although It's Not Very Useful To Be Honest and that Maybe Have a Bit of Carpet or Something To Place the Muffler onto To Avoid Damaging It All Right Now You Have Access above the Exhaust

And Then once It's Free You Can Carefully Lower It down the Flex Pipe at the Front below the Header Will Allow the Whole Thing To Articulate Down Just Keep an Eye on the O2 Sensor Cable or Cables as I Mentioned and Also You Can See Here that the Elastic Taking Up Is Taking Up a Little Bit and Providing some You Know Midsection Support although It's Not Very Useful To Be Honest and that Maybe Have a Bit of Carpet or Something To Place the Muffler onto To Avoid Damaging It All Right Now You Have Access

above the Exhaust or to the Head about Components on the Exhaust Itself that You Might Want To Work On and after All that Putting It all Back Together Is Just a Simple Reversal of What I've Talked about So Far and Much Easier Fortunately You Can Use More Silicone Grease To Guarantee Things but the Rubber Hangers Go Back On Far Easier Just by Hand Then They Came Off So Lift It Up and Do the Muffler End First Again Then Work Your Way Back Along and Do the Rest of the Hangers

You Can Use More Silicone Grease To Guarantee Things but the Rubber Hangers Go Back On Far Easier Just by Hand Then They Came Off So Lift It Up and Do the Muffler End First Again Then Work Your Way Back Along and Do the Rest of the Hangers Don't Forget any It's Probably a Good Idea To Know How Many There Were and Then Tick Them Off One by One and Then Finally Sort Out the O2 Sensor Cables and Then That Says When You Next Start the Engine and Just Have a Quick Listen to It from the Back of the Car if You Think There's any Chance that You Did any Damage

VW / Audi exhaust sleeve and clamp replacement guide - Easy DIY - VW / Audi exhaust sleeve and clamp replacement guide - Easy DIY by Revive My Ride 30,792 views 2 years ago 5 minutes, 34 seconds - Learn how to replace your old **exhaust**, pipe connector and clamps with new Mikalor Stainless Steel ones.
