This box set contains the fourth, fifth, and sixth books in the Evaran Chronicles. If you like science fiction, time travel, technology, and adventure with a space-opera bent, then this series is for you. **The Time Refugee—Book 4 of the Evaran Chronicles** In the year 3104, United Planets Agent Jane Trellis finds new hope in cracking the illegal augment trade when time travelers Dr. Albert Snowden; his niece, Emily; V; and Evaran arrive at Roeth, a planet 740 light-years away from Earth. With Jane's new allies, she can finally check out the Dyson bubble that is under quarantine. On a personal note, she hopes to discover more about how her husband died while working there. Experiencing timeline changes, meeting multiple timeline versions of people, rooting out a timeline anomaly, and facing off against a timeline threat were not things Jane had envisioned herself ever doing, yet she finds herself in the middle of all those issues. Becoming a time refugee was definitely not on her list of things to do. **The Evaran Origin—Book 5 of the Evaran Chronicles** Thoughts can take on physical form. Dr. Albert Snowden and his niece, Emily, never thought they would be able to travel through space and time. Or out of the timeline. Or out of the universe. Or even out of the plane that houses universes. Yet that is where they find themselves while exploring the origin of Evaran, the mysterious being who rescued them from an alien abduction six months ago. Having to deal with the fact that they are part of a time loop that has not yet been fulfilled is one issue. Learning of another version of Evaran who needs their help in a parallel universe is an additional problem. Hampering their efforts along the way are the Time Wardens, a hideously intelligent race from the timeline void, who relentlessly hunt any time traveler. Evaran and crew, along with new allies, will try to help the other Evaran while dealing with the Time Wardens and other threats. If you like science fiction, time travel, and action and adventure, then this book is for you. **The Shadow Connection—Book 6 of the Evaran Chronicles** Dr. Albert Snowden and his niece, Emily, are back on Earth after six months of traveling through space, time, and beyond with Evaran, the mysterious stranger who rescued them from an alien abduction. They were expecting to get some peace and quiet after the hectic nature of some of their previous adventures. However, things get complicated when Evaran's ship, the Torvatta, is stolen. To make matters worse, Dr. Snowden has to deal with the near-death experience from a recent event. He and Emily must also adjust to the new side effects of their nanobots, which were enhanced prior to going back to Earth. As they look for the Torvatta, they must also deal with a rogue faction of the Helians, the group that represents Earth from a galactic perspective. Evaran will call upon old and new friends within the nonhuman world to deal with the defected Helian sect. What they find drags Evaran and his new allies deeper into a global event that has timeline implications.

Timeslingers: Season 1

Writer's Digest Self-Published Book Awards Judge Comments: Timeslingers Season 1 by Jay Sherer and Nathan Scheck is a series of episodes written in an unorthodox but riveting manner. Fast pacing and powerful hooks will keep the attention of readers from the first page to the last in this genre blend filled with adventure, technology, and science. It seems to be one of those trailblazing pieces of work that will eventually have plenty of copycats, giving it a place in literary history. Although this is classified as genre (and I agree that it is), I think it can also be considered mainstream. "Timeslingers draws you in from the first word, and then rockets along at a breakneck pace. It will be hard not to read this book in one sitting..." - Bobby Nash, author of *Deadly Games*, *Evil Ways*, *Lance Star: Sky Ranger*, and more "Timeslingers is an innovative and entertaining series that takes me to times and places I love. Be careful. It will lure you in." - Joseph Bentz, author of *A Son Comes Home* "An awesome throwback to the sci-fi adventure serials that have been missing from the world lately." - Kaleb, Timeslingers Facebook Fan A formula stolen. A president murdered. A future threatened. The Xi'an Liberation Society (XLS) banks on chaos. They exist to usurp the global Union government's power. Their methods toe the line between rebellion and terrorism...and they have just discovered a top secret Union project. Led by Marcus Kline, the XLS launches a calculated assault on history in order to annihilate the Union's future. The only thing standing in their way is an elite team of time travel operatives: The Union Subdivision. But as the Subdivision attempts to preserve the past, they will reach their breaking point, and the clash of "timeslingers" will resound across centuries.

Timeslingers: Season 1 is a compilation of twenty-five episodes from the online time travel adventure series. A throwback to classic newspaper serials of the past, it is an easy-to-read, fast-paced story that starts out with a bang and keeps firing. From Los Alamos National Laboratories and the Apollo Program, to 2019 Moscow and 2147 New London, no part of history is safe.

Revenge of the Black Knight

To get him back, they must travel to medieval England and repair his family timeline. They plan to enter the period, fix the problem and leave—quick and clean. But, as medieval intrigue swirls about them—with murders, a castle siege and a mysterious knight in black bent on revenge—new loyalties draw them into a web of danger. Weapons and armies can change the course of history but Maddy knows matters of the heart can warp the timeline too. She avoids flirty knights and nobles, but a relationship based on mutual antagonism seems safe enough—until the hostility ebbs away and a more dangerous emotion creeps in. Time Control

We all travel in time. During the last year, I've moved forward one year and so have you. Another way to say that is that we travel in time at the rate of 1 hour per hour. "We like the idea of time traveling because if we go back in time, many of us would like to change things to make the future better. And if you travel to the future, you'd want to come back with some wonderful discovery and share it to improve human life. So the desire to time travel is quite a positive fantasy to have," But the question is, can we travel in time faster or slower than "1 hour per hour"? Or can we actually travel backward in time, going back, say 2 hours per hour, or 10 or 100 years per hour? It is mind-boggling to think about time travel. What if you went back in time and prevented your father and mother from the meeting? You would prevent yourself from ever having been born! But then if you hadn't been born, you could not have gone back in time to prevent them from the meeting. The great 20th-century scientist Albert Einstein developed a theory called Special Relativity. The ideas of Special Relativity are very hard to imagine because they aren't about what we experience in everyday life, but scientists have confirmed them. This theory says that space and time are really aspects of the same thing-space-time. There's a speed limit of 300,000 kilometers per second (or 186,000 miles per second) for anything that travels through space-time, and light always travels the speed limit through empty space. Special Relativity also says that a surprising thing happens when you move through space-time, especially when your speed relative to other objects is close to the speed of light. Time goes slower for you than for the people you left behind. You won't notice this effect until you return to those stationary people. Say you were 15 years old when you left Earth in a spacecraft traveling at about 99.5% of the speed of light (which is much faster than we can achieve now) and celebrated only five birthdays during your space voyage. When you get home at the age of 20, you would find that all your classmates were 65 years old, retired, and enjoying their grandchildren! Because time passed more slowly for you, you will have experienced only five years of life, while your classmates will have experienced a full 50 years. So, if your journey began in 2003, it would have taken you only 5 years to travel to the year 2053, whereas it would have taken all of your friends 50 years. In a sense, this means you have been time traveling. This is a way of going to the future at a rate faster than 1 hour per hour. Time travel of a sort also occurs for objects in gravitational fields. Einstein had another remarkable theory called General Relativity, which predicts that time passes more slowly for objects in gravitational fields (like here on Earth) than for objects far from such fields. So there are all kinds of space and time distortions near black holes, where the gravity can be very intense. In the past few years, some scientists have used those distortions in space-time to think of possible ways time machines could work. Some like the idea of "wormholes," which may be shortcuts through space-time. This and other ideas are wonderfully interesting, but we don't know at this point whether they are possible for real objects. Still, the ideas are based on good, solid science. In all time travel theories allowed by real science, there is no way a traveler can go back in time to before the time machine was built.

Welcome to Zhangjiajie for the 3rd International Conference on Computer Network and Mobile Computing

(ICCNMC 2005). We are currently witnessing a proliferation in mobile/wireless technologies and applications. However, these new technologies have ushered in unprecedented challenges for the research community across the range of networking, mobile computing, network security and wireless web applications, and optical network topics. ICCNMC 2005 was sponsored by the China Computer Federation, in cooperation with the Institute for Electrical and Electronics Engineers (IEEE) Computer Society. The objective of this conference was to address and capture highly innovative and state-of-the-art research and work in the networks and mobile computing industries. ICCNMC 2005 allowed sharing of the underlying theories and applications, and the establishment of new and long-term collaborative channels aimed at developing innovative concepts and solutions geared to future markets. The highly positive response to ICCNMC 2001 and ICCNMC 2003, held in Beijing and Shanghai, respectively, encouraged us to continue this international event. In its third year, ICCNMC 2005 continued to provide a forum for researchers, professionals, and industrial practitioners from around the world to report on new advances in computer network and mobile computing, as well as to identify issues and directions for research and development in the new era of evolving technologies.
