Thoreau and the Art of Life

Featuring nearly 100 luminous watercolor illustrations, *Thoreau and the Art of Life* collects eloquent passages from the writings of the seminal author and philosopher. Drawn mainly from his journals, the short excerpts provide fascinating insight into his thought processes by presenting his raw, unedited feelings about the things that meant the most to him. The book reflects Thoreau's deep beliefs and ideas about nature, relationships, creativity, spirituality, aging, simplicity, and wisdom. By eloquently expressing his thoughts about life and what gives it value, he leads the reader to a closer examination of life. Thoreau's work asks us to live our own truths with joy and discipline and to recognize that we live in a universe of extraordinary beauty, mystery, and wonder. An avid reader of Thoreau, editor and illustrator Roderick MacIver organized the passages by themes: love and friendship; art, creativity, and writing; aging, disease, and death; human society and culture; nature and the human connection to the natural world; and wisdom, truth, solitude, and simplicity. The book includes a chronology and brief biography. Thoreau's words of wisdom combined with MacIver's vivid illustrations of the American landscape will resonate with nature enthusiasts and a broad range of readers interested in art, environmentalism, literature, and philosophy. "It is something to be able to paint a particular picture, or to carve a statue, and so to make a few objects beautiful, but it is more glorious to carve and paint the very atmosphere and medium through which we look, which morally we can do. To affect the quality of the day, that is the highest of arts. Every man is tasked to make his life, even in its details, worthy of the contemplation of his most elevated and critical hour." —Henry David Thoreau

Thoreau and the Art of Life

Henry David Thoreau wrote extensively on love, friendship, creativity, spirituality and wisdom. This book draws from his writings to offer unusual insights on living a life of meaning, creativity and reverence. Roderick MacIver's full-color wild nature watercolors enhance this wonderful collection.

From Career to Calling

Finalist in the Australian Career Book Award 2020, supported by the Royal Society of Arts Oceania Finding and following an authentic calling challenges us to bridge both the intuitive, soulful and the hard-edged, material dimensions of everyday life. *From Career to Calling: A Depth Psychology Guide to Soul-Making Work in Darkening Times* opens new avenues for vocational exploration and career inquiry in an imaginative way. This unique book draws on insights from the field of Jungian and archetypal psychology to reimagine our attitudes and approaches to work, money, vocational guidance and career development. As people find themselves disillusioned with or disenfranchised from capitalist notions of work and career, Suzanne Cremen's interdisciplinary approach illuminates how a creative, meaningful and influential work-life can emerge from attending to the archetypal basis of experience. Interweaving elements of her own journey, Cremen connects individual experience with the collective in an original way, spotlighting depression in the legal profession, marginalization of the feminine principle in work environments, and how understanding the roots of our cultural complexes can spark personal callings which facilitate collective transformation. Blending compelling real-life stories with robust scholarly analysis and reflective activities, this book will help practitioners to support individuals to develop a sense of their soul's calling and offer guidance on

creating an authentic vocational life within the constraints of the contemporary era. Additionally, it will be invaluable to those in career transition, re-discovering their purpose at the end of a career, or commencing work-life.

The Illustrated Walden

Henry David Thoreau built his small cabin on Walden Pond in 1845 and, for two years, lived there as simply as possible, eliminating the unnecessary material and spiritual details that intrude upon human happiness. Thoreau described his experiences in Walden, using vivid, forceful prose that transforms his reflections on nature into richly evocative metaphors. This beautiful illustrated edition brings a rarely seen visual dimension to Thoreau's philosophical masterpiece.

The Heron Dance Book of Love and Gratitude

In *The Heron Dance Book of Love and Gratitude*, Roderick MacIver uses text and pictures to encourage readers to discover that “all-transcendent meaning” in their daily lives. This wise and comforting book celebrates the open heart and the beauty and mystery that surround us through a wide array of voices and perspectives. MacIver weaves inspirational poetry and prose with his shimmering nature watercolors to create a book that helps readers discover—and honor—love and gratitude. These quotes from men and women span time and geography, but share a sense of hard-won wisdom. Henry Miller finds unexpected late-life solace in embracing the simple quality of trust. Gabriel García Márquez muses, “If I knew that this would be the last time you pass through this door, I’d embrace you, kiss you, and call you back for one more.” Helen Keller says, “God is in me as the sun is in the color and fragrance of a flower.” This book is equally rewarding when sampled or read cover to cover as a respite from the pressures of modern life.

Sculpting in Time

One of the earliest warnings about climate change and one of environmentalism's lodestars 'Nature, we believe, takes forever. It moves with infinite slowness,' begins the first book to bring climate change to public attention. Interweaving lyrical observations from his life in the Adirondack Mountains with insights from the emerging science, Bill McKibben sets out the central developments not only of the environmental crisis now facing us but also the terms of our response, from policy to the fundamental, philosophical shift in our relationship with the natural world which, he argues, could save us. A moving elegy to nature in its pristine, pre-human wildness, *The End of Nature* is both a milestone in environmental thought, indispensable to understanding how we arrived here.

The End of Nature

"Walden. Yesterday I came here to live." That entry from the journal of Henry David Thoreau, and the intellectual journey it began, would by themselves be enough to place Thoreau in the American pantheon. His attempt to "live deliberately" in a small woods at the edge of his hometown of Concord has been a touchstone for individualists and seekers since the publication of *Walden* in 1854. But there was much more to Thoreau than his brief experiment in living at Walden Pond. A member of the vibrant intellectual circle centered on his neighbor Ralph Waldo Emerson, he was also an ardent naturalist, a manual laborer and inventor, a radical political activist, and more. Many books have taken up various aspects of Thoreau's character and achievements, but, as Laura Dassow Walls writes, "Thoreau has never been captured between

covers; he was too quixotic, mischievous, many-sided.\" Two hundred years after his birth, and two generations after the last full-scale biography, Walls renews Henry David Thoreau for us in all his profound, inspiring complexity. Drawing on Thoreau's copious writings, published and unpublished, Walls presents a Thoreau vigorously alive, full of quirks and contradictions: the young man shattered by the sudden death of his brother; the ambitious Harvard College student; the ecstatic visionary who closed Walden with an account of the regenerative power of the Cosmos. We meet the man whose belief in human freedom and the value of labor made him an uncompromising abolitionist; the solitary walker who found society in nature, but also found his own nature in the society of which he was a deeply interwoven part. And, running through it all, Thoreau the passionate naturalist, who, long before the age of environmentalism, saw tragedy for future generations in the human heedlessness around him. \"The Thoreau I sought was not in any book, so I wrote this one,\" says Walls. The result is a Thoreau unlike any seen since he walked the streets of Concord, a Thoreau for our time and all time.--Dust jacket.

Henry David Thoreau

“The sage of Walden Pond is himself in the mix with a quote-a-day compendium from Thoreau biographer Laura Dassow Walls of some of his best observations.” —Wall Street Journal “Live in each season as it passes; breathe the air, drink the drink, taste the fruit, and resign yourself to the influence of each.” Modernity rules our lives by clock and calendar, dividing the stream of time into units. Henry David Thoreau subverted both clock and calendar, using them not to regulate time’s passing but to open up and explore its presence. This volume embodies Thoreau’s own ambition to “live in season” —to turn with the living sundial of the world, and, by attuning ourselves to nature. Ralph Waldo Emerson noted with awe that from flowers alone, Thoreau could tell the calendar date within two days; children remembered long into adulthood how Thoreau showed them white waterlilies awakening not by the face of a clock but at the first touch of the sun. As Thoreau wrote in Walden, “Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is.” Drawn from the full range of Thoreau’s journals and published writings, and arranged according to season, *The Daily Henry David Thoreau* allows us to discover the endless variation to be found in the repetitions of mundane cycles. Thoreau saw in the kernel of each day an earth enchanted, one he honed into sentences tuned with an artist’s eye and a musician’s ear. Thoreau’s world lives on in his writing so that we, too, may discover, even in a fallen world, a beauty worth defending.

The Experience of Nature

The Passion of the Western Mind is a complete guide to Western civilisation and the philosophical ideas that have shaped our world view. From Plato to Hegel, from Augustine to Nietzsche, from Copernicus to Freud, Richard Tarnas described profound philosophical concepts simply, but without simplifying them. Ten years in the making, *The Passion of the Western Mind* was hailed as an instant classic on publication. In it, Tarnas provides a compelling account of the evolution of the Western mind and its changing conception of reality. Advances on several fronts - in philosophy, psychology, religious studies and the history of science - have shed new light on this remarkable evolution and Tarnas draws together these advances to set forth a new perspective for understanding out culture's intellectual and spiritual history. The result is a complete liberal education in a single volume.

Meditations of John Muir

The writings of Henry David Thoreau (1817-1862) have captivated scholars, activists, and ecologists for more than a century. Less attention has been paid, however, to the author’s political philosophy and its

influence on American public life. Although Thoreau's doctrine of civil disobedience has long since become a touchstone of world history, the greater part of his political legacy has been overlooked. With a resurgence of interest in recent years, *A Political Companion to Henry David Thoreau* is the first volume focused exclusively on Thoreau's ethical and political thought. Jack Turner illuminates the unexamined aspects of Thoreau's political life and writings. Combining both new and classic essays, this book offers a fresh and comprehensive understanding of Thoreau's politics, and includes discussions of subjects ranging from his democratic individualism to the political relevance of his intellectual eccentricity. The collection consists of works by sixteen prominent political theorists and includes an extended bibliography on Thoreau's politics. *A Political Companion to Henry David Thoreau* is a landmark reference for anyone seeking a better understanding of Thoreau's complex political philosophy.

The Best Nonfiction Masterpiece of the 20th Century? "There are two lives, the natural and the spiritual, and we must lose the one before we can participate in the other." - William James, *The Varieties of Religious Experience: A Study in Human Nature* *The Varieties of Religious Experience: A Study in Human Nature* is not a book about a specific religion. The author, psychologist William James does not try to convince the reader one religion is better than the other. He doesn't even make a case for atheism and the scientific approach. The book is in fact about human nature and how we experience religion at a psychological level. Xist Publishing is a digital-first publisher. The Varieties of Religious Experience: A Study in Human Nature

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the

corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.” —Jonathan Yardley, *The Washington Post Book World*

The Art of Living

Selections from one of the great classics of literature--now part of the Shambhala Pocket Library. In July 1845, Henry David Thoreau built a small cottage in the woods near Walden Pond in Concord, Massachusetts, and began to write *Walden*, a chronicle of his communion with nature. Since its first publication in 1854, the work has become a classic, beloved for its message of living simply and in harmony with nature. This abridged edition of *Walden* features exquisite wood engravings by Michael McCurdy and a foreword by noted author and environmentalist Terry Tempest Williams, who reflects upon Thoreau's message that as we explore our world and ourselves, we draw closer to the truth of our connectedness. This book is part of the Shambhala Pocket Library series. The Shambhala Pocket Library is a collection of short, portable teachings from notable figures across religious traditions and classic texts. The covers in this series are rendered by Colorado artist Robert Spellman. The books in this collection distill the wisdom and heart of the work Shambhala Publications has published over 50 years into a compact format that is collectible, reader-friendly, and applicable to everyday life.

The Night Country

The conflict between scientific observation and poetry, reflections on abolition, transcendental philosophy, other concerns are explored in this superb general selection from Thoreau's voluminous *Journal*.

Thoreau on Man & Nature;

A new re-issue of the cult swimming classic, a beautiful read filled with detailed description and powerful prose. WITH A NEW INTRODUCTION BY AMY LIPTRON ‘A luminously romantic history of swimming’ *Guardian* *Haunts of the Black Masseur* is a dazzling introduction to the great swimming heroes, from Byron leaping into the surf at Shelley's funeral to Hart Crane diving to his death in the Bay of Mexico. Bursting with anecdotes, Charles Sprawson leads us into a watery world populated by lithe demi-gods – a world that has obsessed humans from the ancient Greeks and Romans, to Yeats, Woolf, Fitzgerald and Hockney. Original, enticing and dripping with references to literature, film, art and Olympic history, this cult swimming classic pays sparkling tribute to water and the cultural meanings we attach to it. ‘This splendid and wholly original book is as zestful as a plunge in champagne’ Iris Murdoch

Amusing Ourselves to Death

“If Tom Montgomery Fate has not found the secret formula for the deliberate, balanced life, he is a chief disciple of the search.”—Chicago Tribune Try to imagine Thoreau married, with a job, three kids, and a minivan. This is the sensibility—serious yet irreverent—that suffuses *Cabin Fever*, as the author seeks to apply the hermit-philosopher's insights to a busy modern life. Tom Montgomery Fate lives in a Chicago suburb, where he is a husband, father, professor, and active member of his community. He also lives in a cabin built with the help of friends in the Michigan woods, where he walks by the river, chops wood, and reads Thoreau by candlelight. Fate seeks a more attentive, deliberate way of seeing the world and our place in it, not only in the woods but also in the context of our relationships and society. In his search for “a more deliberate life” amid a high-tech, material world, Fate invites readers into an interrogation of their own lives,

and into a new kind of vision: the possibility of enough in a culture of more.

Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Heart of Thoreau's Journals

When Henry David Thoreau died at the age of forty-four in 1862, he had written a forest of articles and essays that eventually earned him a reputation as a first-rate naturalist, conservationist, and social critic. His gravesite in Concord, Massachusetts, is a pilgrimage site for readers who still turn to *Walden*, *A Week on the Concord and Merrimack Rivers*, *Maine Woods*, "Civil Disobedience," and "Walking" for inspiration. Thoreau was a supreme articulator of America's conscience when the country was industrializing, facing battle over slavery, and developing its public education system. His thoughts are brook-clear and strangely prescient today.

Haunts of the Black Masseur

The recent release of Pope Francis's much-discussed encyclical on the environment, *Laudato Si': On Care for Our Common Home*, has reinforced environmental issues as also moral and spiritual issues. This anthology, twenty years ahead of the encyclical but very much in line with its agenda, offers essays by fifteen philosophers, theologians, and environmentalists who argue for a response to ecology that recognizes the tools of science but includes a more spiritual approach - one with a more humanistic, holistic view based on inherent reverence toward the natural world. Writers whose orientations range from Buddhism to evangelical Christianity to Catholicism to Native American beliefs explore ways to achieve this paradigm shift and suggest that "the environment is not only a spiritual issue, but the spiritual issue of our time."

Cabin Fever

Thoreau's *Living Ethics* is the first full, rigorous account of Henry Thoreau's ethical philosophy. Focused on *Walden* but ranging widely across his writings, the study situates Thoreau within a long tradition of ethical thinking in the West, from the ancients to the Romantics and on to the present day. Philip Cafaro shows Thoreau grappling with important ethical questions that agitated his own society and discusses his value for those seeking to understand contemporary ethical issues. Cafaro's particular interest is in Thoreau's treatment of virtue ethics: the branch of ethics centered on personal and social flourishing. Ranging across the central elements of Thoreau's philosophy—life, virtue, economy, solitude and society, nature, and politics—Cafaro shows Thoreau developing a comprehensive virtue ethics, less based in ancient philosophy than many recent efforts and more grounded in modern life and experience. He presents Thoreau's evolutionary, experimental ethics as superior to the more static foundational efforts of current virtue ethicists. Another main focus is

Thoreau's environmental ethics. The book shows Thoreau not only anticipating recent arguments for wild nature's intrinsic value, but also demonstrating how a personal connection to nature furthers self-development, moral character, knowledge, and creativity. Thoreau's life and writings, argues Cafaro, present a positive, life-affirming environmental ethics, combining respect and restraint with an appreciation for human possibilities for flourishing within nature.

The Greening of Faith

The Pulitzer Prize-winning novel about the remarkable year one woman spent in Virginia's Roanoke Valley—now available in a limited Olive Edition. "A remarkable psalm of terror and celebration."—Time Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley. Annie Dillard sets out to see what she can see. What she sees are astonishing incidents of "beauty tangled in a rapture with violence." Her personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, Dillard stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.

Thoreau's Living Ethics

Forty years as a poet has kept Robert Cording looking at the details of everyday experience. That long labor has brought him face-to-face with the inescapable complexity of a world that is full of suffering and injustice. And grace. This journey has convinced him that, as Czeslaw Milosz puts it, "poetry embodies the double life of our common human circumstance as beings in between the dust that we are and the divinity to which we would aspire." Cording's task has therefore been to evoke what he calls "the primordial intuitions of Christianity": that we live in a world we did not create; that God's immanent presence is capable of breaking in on us at every moment; that most of the time we cannot "taste and see" that presence because we live in a world of mirrors; that only by attention can we live in the world but outside of our existing conceptions of it. The reflections in Finding the World's Fullness--comprising not only thoughts on metaphor but also close readings of poets ancient and modern, including George Herbert, Robert Browning, Elizabeth Bishop, and Stanley Kunitz--suggest that, as Richard Wilbur puts it, "The world's fullness is not made but found."

The Doors of Perception and Heaven and Hell

Peabody Award-winning broadcaster and National Humanities Medalist Krista Tippett has interviewed the most extraordinary voices examining the great questions of meaning for our time. The heart of her work on her national public radio program and podcast, On Being, has been to shine a light on people whose insights

kindle in us a sense of wonder and courage. Scientists in a variety of fields; theologians from an array of faiths; poets, activists, and many others have all opened themselves up to Tippet's compassionate yet searching conversation. In *Becoming Wise*, Tippet distills the insights she has gleaned from this luminous conversation in its many dimensions into a coherent narrative journey, over time and from mind to mind. The book is a master class in living, curated by Tippet and accompanied by a delightfully ecumenical dream team of teaching faculty. The open questions and challenges of our time are intimate and civilizational all at once, Tippet says - definitions of when life begins and when death happens, of the meaning of community and family and identity, of our relationships to technology and through technology. The wisdom we seek emerges through the raw materials of the everyday. And the enduring question of what it means to be human has now become inextricable from the question of who we are to each other. This book offers a grounded and fiercely hopeful vision of humanity for this century - of personal growth but also renewed public life and human spiritual evolution. It insists on the possibility of a common life for this century marked by resilience and redemption, with beauty as a core moral value and civility and love as muscular practice. Krista Tippet's great gift, in her work and in *Becoming Wise*, is to avoid reductive simplifications but still find the golden threads that weave people and ideas together into a shimmering braid. One powerful common denominator of the lessons imparted to Tippet is the gift of presence, of the exhilaration of engagement with life for its own sake, not as a means to an end. But presence does not mean passivity or acceptance of the status quo. Indeed Tippet and her teachers are people whose work meets, and often drives, powerful forces of change alive in the world today. In the end, perhaps the greatest blessing conveyed by the lessons of spiritual genius Tippet harvests in *Becoming Wise* is the strength to meet the world where it really is, and then to make it better.

What is the proper relationship between human beings and the more-than-human world? This philosophical question, which underlies vast environmental crises, forces us to investigate the tension between our extraordinary powers, which seem to set us apart from nature, even above it, and our thoroughgoing ordinariness, as revealed by the evolutionary history we share with all life. The contributors to this volume ask us to consider whether the anxiety of *unheimlichkeit*, which in one form or another absorbed so much of twentieth-century philosophy, might reveal not our homelessness in the cosmos but a need for a fundamental belongingness and implacement in it.

Pilgrim at Tinker Creek

The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung's revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life's work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

Finding the World's Fullness

'Kimmerer blends, with deep attentiveness and musicality, science and personal insights to tell the overlooked story of the planet's oldest plants' Guardian 'Bewitching ... a masterwork ... a glittering read in its entirety' Maria Popova, Brainpickings Living at the limits of our ordinary perception, mosses are a common but largely unnoticed element of the natural world. Gathering Moss is a beautifully written mix of science and personal reflection that invites readers to explore and learn from the elegantly simple lives of mosses. In these interwoven essays, Robin Wall Kimmerer leads general readers and scientists alike to an understanding of how mosses live and how their lives are intertwined with the lives of countless other beings. Kimmerer explains the biology of mosses clearly and artfully, while at the same time reflecting on what these fascinating organisms have to teach us. Drawing on her experiences as a scientist, a mother, and a Native American, Kimmerer explains the stories of mosses in scientific terms as well as within the framework of indigenous ways of knowing. In her book, the natural history and cultural relationships of mosses become a powerful metaphor for ways of living in the world.
